EXTRUTECH PLASTICS, INC. Announces  
a New, Patented, Concrete Plastic Wall Form  
called “Extrutech FORM System”,(EFS).

MANITOWOC, WI, JANUARY 1, 2014 – Extrutech Plastics Inc.  
has now begun production of a new, patented, “stay in place”,  
plastic concrete form system. The Extrutech FORM is 24” wide  
by 6” thick and snaps together with the double-spline, E-Locking  
System. The concrete wall forms are pre-cut to the project  
specifications and shipped as a kit to the jobsite for quick  
assembly. The Extrutech FORM can also be insulated with  
2” of insulated foam board for R-14. Brick or stone masonry  
may be added to exterior, to enhance the buildings appearance.

The Extrutech FORM System (EFS) offers a superior sanitary  
surface on both sides of the finished concrete wall. This system  
is designed for long-lasting durability and ease of sanitation and  
maintenance. The Extrutech FORM has a bright white, high gloss,  
easy-to-clean, non-porous surface that resists damage, and brightens  
any area. These waterproof, concrete forms will never rust, rot, corrode  
or discolor and are ideal for high moisture areas where daily sanitation is  
critical to the owner.

The Extrutech FORM System is an ideal concrete wall form panel for Dairy, Hog and Poultry  
Facilities. They can also be used in the construction of Milking Parlors, Cheese and Milk Plants,  
Food Processing Facilities, Car and Truck Washes, Water Treatment, Cold Storage, Bottling  
Plants, Laboratories and Clean Rooms. Other uses include below-ground aquatic tanks, sea  
walls, storage tanks, tornado shelters or quick-set emergency shelters.

Since 1992, Extrutech Plastics has specialized in sanitary, corrosion and water proof, plastic wall  
and ceiling panels, and plastic doors. The company is certified ISO 9001-2008 QMS compliant  
and a US Government certified supplier. All products are made in the USA. For additional  
information please call 888-818-0118 or visit our website.....END
