

# DIY UNDERGROUND SHELTERS

USA

EXTRUTECH PLASTICS, INC.

MADE IN THE USA

Since 1992

USA

U.S. Patent 8,677,713  
Canadian Patent 2,833,490  
Mexican Patent 344648

## PROTECTION - SAFETY - SECURITY

In today's uncertain environment, the safety and protection of your family and loved ones is something that can no longer be left to chance. With the use of our stay-in-place concrete FORM panel, you can build a safe, strong, reinforced underground shelter with your own hands.

The FORM panel comes 24" wide and 6' to 20' long. The panels snap and lock together to form your shelter walls. These forms are drilled with holes to allow the cement to flow from one section to another and also hold reinforcing steel rebar.

Electrical raceways can also be added inside the FORM. Fill with 4,000# PSI cement. Add a 10" Concrete Roof and Ceiling to complete the room. Room sizes can be custom designed by you. We supply the custom made forms as a kit that you put together.

Finished Underground Shelter

10" roof system with penetrations ready for cement.

## FIVE EASY STEPS

1. Assemble FORMS on footings
2. Load Rebar for reinforcement
3. Brace Forms
4. Fill with cement
5. Add Roof / Ceiling

EXTRUTECH FORM  
6" and 8" Thick Walls  
24" Wide Panels  
Snap and Lock Together  
Easy Assemble  
Custom Lengths

## Stay-in-Place Concrete Wall FORM<sup>®</sup> system

MADE IN THE USA

### Advantages:

- Quick Installation
- Perfect for high moisture areas, where corrosion can be a problem
- Two foot wide panels means fewer seams
- Custom cut panel to 20' long
- Snaps together for quick installation
- Double spline, E-locking system
- Use standard rebar reinforcing methods
- Waterproof and corrosion-proof
- Panels will not rust, rot, or flake
- Resists mold, mildew, and bacterial growth
- Low V.O.C. panels with honeycomb interior walls for maximum panel stability
- Protective film that is easy to peel off and keeps panels clean during construction

Concrete FORMS with rebar.

Fill FORMS with 4000# PSI cement.

Finished shelter walls ready for floor and roof.

### Feature and Option Details:

1. 2' Wide Panel (Quicker setup, stronger panel, less handling)
2. 2" Insulated Panel (Insulated barrier inside a pre-finished exterior surface)
3. Colored Panels (Available in White, Beige, and Gray exterior colors)
4. Clear Protective Film (Keeps panels clean during construction)
5. Double Spline E-Locking System (Insert two splines at each joint to lock the panels together, for secure leakproof joints )
6. Horizontal and Vertical rebar (per project specifications)
7. Male/Female Edge Connection (Quick snap-together connection)
8. Electrical Chase (Providing electrical access as needed)
9. Custom size rooms made to your print
10. Easy to Assemble
